MESSAGES

Lala Rajinder Parshad
Chairman

I welcome you to the family of students in Aashadeep Group of Educations, Which was established in the year of 2003 with the objective of providing modern education with special emphasis on information technology through advanced learning techniques. I think skill development courses in information technology & other trades is necessary because Information Technology has the potential to absorb 5.34 million people by 2017-2018. Information-Technology will be a great economic booster as export revenue estimate of INDIA will increase to 270337.17USD Million by 2017-2018. Above statistics clearly shows that future of IT & Knowledge industry is vast, but still there is a great gap in the demand and supply of IT professionals in INDIA.

The objective of Skill Development is to create a workforce empowered with the necessary and continuously upgraded skills, knowledge and internationally recognized qualifications to gain access to decent employment and ensure India's competitiveness in the dynamic global market. It aims at increasing the productivity and employability of workforce (wage and self-employed) both in the organized and the unorganized sectors. It seeks increased participation of youth, women, disabled and other disadvantaged sections and to synergize efforts of various sectors and reforms the present system with the enhanced capability to adapt to changing technologies and market demands.

As per above said it is clear that future of IT & Knowledge industry is huge. So if you're thinking about going back to school and continuing your professional development, you might want to consider enrolling in a certificate or diploma program. With their concentrated classes and practical skills, certifications and diplomas can be a great alternative to a traditional degree program.

On behalf of Aashadeep Group of Educations, I invite your participation, in realizing a dream of making this nation, a knowledge intensive society. I wish you all the best in your pursuit of excellence in Modern Education.

Suresh Arora
President

Success easily comes to those who have pleasing personalities. However, this does not necessarily mean that you need to what everyone wishes, rather acquire positive attitude of being respectful to the opinion of others. At the same time remain true to your own beliefs. In fact the biggest task is to know your ownself. A proper knowledge of the self equips you better to achieve your goals. Have the strength & courage to turn all your negative points into positive dues. When Amitabh Bachan joined the film industry, he was written off as a man with course and most unpleasing voice. Sachin Tendulkar was written off for his short stature. But both of them with their grit and courage turned their weak points into their strength.

Today Amitabh, the mega star, is known as a man with golden and the most manly voice. He is hailed as the star of the millennium by the Indians as well as international press. Sachin used his small stature to play certain typical shots which have earned him the nick name "Little Master".

The cricketers all over the world love to watch him play, wish to emulate the great little master who was honoured with "Golden Bat". In India there is popular saying "if cricket is religion, Sachin is God".

So be positive and learn the art of turning your negative point into your strength. Soon you would find yourself on the top of the world.

ABOUT US

AASHADEEP GROUP OF EDUCATIONS

Aashadeep Group of Education (AGE) was established in the year 2003 with the objective of providing modern education with special emphasis on information technology through advanced learning techniques. We with our team of advanced institutes from country, our hardcore professionals and with over one million man hours of experience, offers the most comprehensive range of Information Technology & many more programs for the students. Also providing Vocational Education or Vocational Education and Training (VET), also called Career and Technical Education (CTE), prepares learners for jobs that are in manual or practical activities, traditionally non-academic and totally related to a specific trade, occupation or vocation, hence the term, in which the learner participates, it is sometimes referred to as technical education, as the learner directly develops expertise in a particular group of techniques or technology.

VISION & MISSION

VISION

To be globally recognized training provider under the name head Aashakiran-The center for quality enhancement program that produces best in class IT Professionals.

MISSION

The mission is to provide our students with the knowledge & latest skills. Institute aims to provide the society with attributes, networks & the global capabilities required for leadership & successes in demanding careers in the global economy.

ABOUT AASHAKIRAN

AASHAKIRAN (THE CENTER FOR QUALITY ENHANCEMENT PROGRAM):-

Aashadeep Group of Educations opens its branches in all the districts and divisions of India (Named Aashakiran -The Center for Quality Enhancement Program) so as to train the youth for job of all the districts and divisions to make our country Progressive. Aashadeep Group of Educations' team will surf all the cities and towns and will authorize its center in the respective town or city, which is already working in the field of education and considered to be the best according to the parameters of AGE.

Our organization welcomes to all new entrepreneurs to join hands with Aashadeep Group of Educations, if they want to start a new venture in the field of quality education and set up their franchise center to run the Professional Courses which are running under our organizations nationwide.

AIMS & OBJECTIVE

- To open institutions all over India which provide the society with attributes, networks and the global capabilities required for leadership & success in demanding careers in the global economy.
- To create awareness among the youth and policy makers of the country about the potential of Information Technology for sustainable development with a focus on all regions of the country.
- To offer comprehensive and challenging advanced course in Information Technology which is able to attract most brilliant and talented young students to achieve high standards of academic excellence, creativity and professional competence.
- To Promote creativity, capability and competence among students to make them first-rate professionals in Information Technology.
- To provide ample opportunity both to students and faculty to meet outside the institute to update their knowledge about the latest advances in the field of Information Technology and share their achievements with the society.
- To develop and promote national and international, linkages by way of partnership in teaching and research.
- To provide a stimulating intellectual environment by holding seminars, peer lectures and national and international conferences/workshops round the year;
- To develop the Institute as a trend-setter in areas crucial both for industry and research. To have an effective Institute and industry interaction;
- To impart theoretical and practical training in major areas on Information Technology.
- To provide a platform for furthering IT based courses and research in other disciplines being offered by the University with a view to promote interdisciplinary research and teaching;
- To carry out advanced research in the field of IT;
- To provide IT based services/consultancy and establish chains in the field of IT;
- To start such short-term academic and training programs as would enrich their existing skills, cater to the specific needs of the industry, government, or public and private sectors, and enhance the employability of the entrants in the field of information technology.

BENEFITS OF CERTIFICATE & DIPLOMA PROGRAMS

Considering Aashadeep's Certificate & Diploma Programs?

If you're thinking about going back to school and continuing your professional development, you might want to consider enrolling in a certificate or diploma program. With their concentrated classes and practical skills, certifications and diplomas can be a great alternative to a traditional bachelor's or master's degree program. Here's a quick list of the benefits certification and degree programs have to offer:

TIME EFFECTIVE

Certification and diploma programs are highly time-effective if you need to complete your education quickly. Certification courses sometimes consist of one four- to twelve-week class, and a series of certification courses can often be completed in a few months.

A diploma program, which is typically made up of a series of required classes, tends to be slightly longer. Even so, you should be able to complete a typical program in 12 to 24 months.

COST EFFECTIVE

Certificate and diploma programs are typically less expensive than a bachelor's or master's degree program. In addition, since they're often designed with working professionals in mind, they tend to be offered online, at night, or on the weekends. That means you'll be able to work (and keep those paychecks coming in) while you're in school.

NETWORKING

Many people who enroll in certificate and diploma programs are already accredited professionals in their fields. This means that your classmates - with whom you may work on group projects, discussion topics, and lab assignments - are also your future colleagues and possibly employers. Kill two birds with one stone and use your time in the classroom to also make valuable business contacts.

FLEXIBLE EDUCATIONAL REQUIREMENTS

While most undergraduate and graduate programs often involve lengthy application and enrollment processes, many certificate and diploma programs do not have minimum or prior educational requirements.

INTERNSHIP OPPORTUNITIES

Some certificate and diploma programs offer students the chance to perform internships and externships. These experiences give you valuable, hands-on training in your field, a chance to build your resume, and a chance to meet and network with future employers and colleagues.

GAIN PRACTICAL SKILLS

Certificate and diploma programs tend to build on skills you already have, allowing you to jump right in to specialized area of studies. Even those courses that teach the basics tend to focus on the skills you'll need to succeed - how to use technologies relevant to your field, how to use computer programs in your field, etc.

- the second you leave the classroom.

GENERAL INSTRUCTION FOR CANDIDATE

HOW TO TAKE ADMISSION

GUIDELINES FOR FILLING UP OFFLINE FORM:-

Fill in application form legibly after carefully reading the prospectus.

Candidate while submitting application form shall follow the instructions given below:

1. The application shall be submitted to our study center where they intend to study. Also direct application form will be accepted by us in the form of registration post.
2. Candidate should submit four copies of passport size photographs of which one must be affixed to the application form and to the identity card at the space provided. The other two be put in the separate cover and enclosed with the application form. On the back of each of these photographs the candidate must mention his/her name, class and serial number of the admission application form.
3. Before submitting the prescribed fees please make sure that you fulfill all the eligibility condition for admission to the program applied for. The fee once paid will not be refunded.

AWARD OF CERTIFICATE/DIPLOMA

Award of Certificate/ Diploma will be issued on request with application form and on payment of prescribed fee, after receiving result, Detail mark card & provisional pass certificate by the candidate. The candidate has to submit an application form along with Draft of fee, Xerox copies of required documents and a self-declaration form to our campus with the help of our study center.

OBJECTIVE OF CERTIFICATE & DIPLOMA COURSES

The objective of Skill Development is to create a workforce empowered with the necessary and continuously upgraded skills, knowledge and internationally recognized qualifications to gain access to decent employment and ensure India's competitiveness in the dynamic global market. It aims at increasing the productivity and employability of workforce (wage and self-employed) both in the organized and the unorganized sectors. It seeks increased participation of youth, women, disabled and other disadvantaged sections and to synergize efforts of various sectors and reforms the present system with the enhanced capability to adapt to changing technologies and labour market demands.

DEMAND OF IT PROFESSIONALS

Information Technology has the potential to absorb 5.34 million people by 2017-2018. Information Technology will be a great economic booster as export revenue estimate of INDIA will increase to 270337.17USD Million by 2017-2018. Above statistics clearly shows that future of IT & Knowledge industry is huge, there is great gap in demand and supply of IT professionals in INDIA.

education requirements.

OUR EDUCATION SYSTEM

The methodology of instruction in this organization is different from other traditional organizations. Our organization's system is more learner-oriented, so much so, the candidate has to be invariably an active participant in the teaching learning process. The organization follows a multi-channel approach for instructions suitably comprising of the following.

Study Material for all subjects, which are supplied in the form of PDF files (Soft Copy).

- Theory & Practical session will be held at study centers, to suit the convenience of candidates.
- Assignments for assessments, evaluation and feedback of comprehension of study material.
- Project work to enable the candidate to gain an insight into independent working on a practical project.

MODE OF TEACHING

1. **Face to Face Mode:** - Where a student has an opportunity to complete the all program structure contents in the class rooms & labs of our study centers through competent faculties during flexible hours.
2. **Online Mode:** - Online Mode comprises of all forms of electronically supported learning and teaching. Content is delivered via internet, audio or Video tapes, satellite TV & CD-ROM. It can be self-paced or instructor-led and includes media in the form of text, image, animation, streaming video & audio.
